

A-ONETECH IS DEDICATED TO THE PUBLIC WELFARE AND BENEFITS PEOPLE WITH PLASCIDE TECHNOLOGY.

Clinical Centre expressed its heartfelt thanks to A-oneTech for donating air sanitizers to them.

A-oneTech has been actively involved in various charitable activities over the years to repay the support of the community. In recent years, through the Anti-Infective Rehabilitation Charity Project promoted by the charity -Kam Wah Ching Sher Association Ltd.

(錦華精舍), the company has provided two sterilizers free of charge to the University of Hong Kong Clinical Center for Teaching and Research to protect the health of patients, patients' families, and medical staff.

After the center started using the air sanitizer with Plascide technology, the air quality was significantly improved. The center manager was delighted with the effectiveness of it, as after using the plascide sanitizer, the chance of cross-infection of the virus is reduced, and the medical staff can concentrate on caring for the patient's work. The manager also mentioned that the act of kindness from A-oneTech Limited had benefited the center's medical staff and patients, and expressed his heartfelt gratitude to the company.

The establishment of A-oneTech can be traced back to the outbreak of the SARS in 2003. At that time, SARS took away hundreds of precious lives. Through SARS's history of heavy casualties, the company established its mission to use technology to save lives, to avoid a similar outbreak of a similar virus to protect the fragility of lives. A-onetech has not forgotten its original mission and vision that to protect human health. The company is continually trying to develop different air sanitization models. At present, A-onetech has applied plasicide technology in Portable, Stand-alone and installed series products to protect humans from germs at all times.
