Air Halo: Breathe Clean Air Wherever You Maybe

Grasp the power of the Air Halo to ensure healthy living for you and your loved ones

Air Halo is a palm perfect air sanitizer powered by a revolutionary Plascide's micro-lightning technology utilizing plasma to destroy germs and neutralize VOCs with unmatched performance. A rechargeable battery provides you hours of protection off-grid or on the move. The Air-Halo is the essential travel companion.

Plascide Technology Eradicate Ineffective Mitigation

Plascide technology was conceived in the aftermath of the 2003, Hong Kong SAR epidemic outbreak which claimed numerous lives. One of the many recent incidents resulted from the ever increasing virus mutations that have become even more damaging and unpredictable to immunize against. For some germs, they have evolved resistance to antibiotic drugs making them incredibly difficult to eradicate biologically. Plascide was developed with funds from the Hong Kong government and is a recent breakthrough in technology to mitigate airborne cross-infection.

Living in Danger Zones is a Fact of Life

According to experts, enclosed spaces where large number of people gather are considered "Danger Zones" that provide ideal conditions for rapid cross infections and epidemics. Germs can easily spread from person to person within a "social distance" of 1 metre or less. Everyday we enter into Danger Zones within an urban city, necessary locations such as train stations, shopping centres and restaurants. Many of us spends hours in commuting in car, taxi, coaches, trains and planes; in meetings and gatherings in indoor environments; in enjoying the company of others in popular locations such as bars, restaurants and shopping malls. The plain fact is that the majority of locations that we visit, travel, work and play typically have no air sanitization or at best old and ineffective air cleaning technology. We all face these health risks as a fact of life, including our love ones. So shouldn't better quality of air to breathe be your priority too? Wouldn't it be nice if you can have clean and healthy air wherever you go?

Our Health Is in our Hands

The inspiration of a cordless air sanitizer was motivated by recognition of the need to take our own health into our hand. Air-Halo encompasses the design principles of "palm-perfect", "travel friendly", "versatile charging", "filter-less" and "caring is sharing", as explained by the Air-Halo Designer, Leo Tong.

Powered by Proven Plascide Technology

The Plascide inventor, Dr. Herman Tsui, a research scientist in fusion plasma and an adjunct professor at the Hong Kong University of Science and Technology, recalled that the 2003 SARS epidemic caught Hong Kong by surprise. The vulnerability of having no effective air sanitization technologies turned the hustle and bustle Hong Kong into a ghost town overnight. With funds from the Hong Kong government, the Plascide technology was born after 3 years of intensive R&D. The revolutionary technology works with intense micro-lightning ionized gas field that sterilizes pathogenic microbes such as H3N2 influenza, MRSA and neutralizes toxic chemicals like formaldehyde. This unique sterilizing attribute means that it's not limited to any specific size or type of pathogens or chemicals and can therefore sanitize known and mutated pathogens. Over the subsequent years, the technology has been proven in sensitive and demanding locations including the border-crossing Lok Ma Chau and Lo Wu rail stations between Hong Kong and ShenZhen (China) as well as the Hong Kong International Airport Control Tower. It is now compressed within Air Halo with the same performance.

Sanitize What Other Technologies Can't

Kickstarter provides an effective platform to rapidly bring the benefits of Air Halo to the world in need. Kickstarter campaigns operate under an “all-or-nothing” funding model so if the Air Halo project doesn't reach it's goal at the end of 30 days, it may not go ahead. Follow their progress on www.air-halo.com and Air-Halo [Facebook](#) Page and spread the word to your social media networks. Show your support and be the first in the world to grasp the power of Air Halo within your finger tips to ensure the healthy living for you and your loved ones.
